

DECLARATION OF USE BY LAND TYPE (REAL PROPERTY)

| Type | Description | Definition | Notes |
|--------------|-------------------|--|---|
| I | Active Reserves | Land holdings with economically- | This would apply to all permitted aggregate |
| | | extractable aggregate resources that | reserves shown on Arizona State Mine Inspector |
| | | possess all necessary entitlements to | (ASMI)-approved reclamation plans currently |
| | | extract. Includes active pit areas but | being mined or prepared for mining. Does not |
| | | excluded mined areas subject to | include resources subject to permitting or |
| | | reclamation requirements or areas | entitlement restrictions, an interim use, or part of |
| | | where permitted reserves exist but | designated process areas discussed below. |
| | | have not yet be prepared for mining or | |
| | | are subject to interim use. | |
| II | Process Areas | Land holdings that are utilized for | Although mineable resources could be present, the |
| | | material processing or operational | location of buildings, plant structures, and other |
| | | support. This could include office, | facility improvements effectively make these |
| | | scales, maintenance areas and shops; | resources inaccessible since environmental permits |
| | | well sites, parking areas and | would likely need to be revised to facilitate the |
| | | permanent site roadways; and | relocation of these features. |
| | | processing and production equipment | |
| | | areas and material stockpile areas. | |
| | | Does not include ponds, fines or | |
| | | overburden storage areas which are | |
| | | considered Type V mined or un- | |
| 777 | T .: D | mineable areas. | |
| III | Inactive Reserves | Land holdings with fully permitted | Interim uses can include grazing, agriculture, dairy |
| | | aggregate reserves but are not | or other high intensity agricultural use. |
| | | economically-extractable and are | Preparation for mining can include activities such |
| | | largely undisturbed. Includes reserves | as overburden stripping, elimination of interim |
| | | that have not been prepared for mining | uses, grading of access roads or construction of |
| | | or are subject to interim uses. | permit-stipulations such as flood control structures. |
| IV | Non-Permitted | Land holdings that may contain | This would apply to land holdings owned or |
| | Resources | economically-extractable aggregate | optioned by mining company that may or may not |
| | | resources in the future but do not have | be contiguous to other permitted operations but do |
| | | required entitlements to mine. | not have an ASMI-approved reclamation plan or |
| | | | lack other critical entitlements such as Floodplain |
| | | | Use Permit (FUP) issued by Maricopa County |
| | | | Flood Control District. |
| \mathbf{V} | Mined and other | Land holdings that have been | Although mineable resources could be present; |
| | Un-Mineable Areas | previously mined or un-mined areas | restrictions, requirements, stipulations or covenants |
| | | that may or may not contain | present in active FUPs, ASMI-approved |
| | | economically-extractable resources | reclamation plans, title reports, zoning overlays, |
| | | but are not mineable due to | condemnations, or Special Permits (SP) show that |
| | | unfavorable site conditions or | these areas cannot be mined. |
| | | entitlement, permitting or land use | This would also apply to lands with mineable |
| | | restraints. Includes buffer and offset | resources that have been isolated to the extent that |
| | | areas, utility easements, jurisdictional | mining is no longer economically practicable or |
| | | waters of the U.S., designated floodways, and areas having unique | where adjacent uses have a higher land value and |
| | | | require appropriate buffers. |
| | | cultural or biological features | |
| | | including critical habitats. Mined | This also includes any setbacks needed for access |
| | | areas will be subject to reclamation requirements in accordance with | roads, berms, or vegetative barriers from the un- |
| | | | mineable areas or buffers from property lines, floodway or floodplain lines, easements, |
| | | ASMI-approved reclamation plan. | |
| | | | jurisdictional waters, permit stipulations, etc. |
